

CARBIDE-FREE SOLUTION

sabre® ARMORED STEEL BLADE

A Premium Steel Solution Engineered for Performance and Cost Stability

Available in 6" and 8" blade heights.

The **Sabre® Armored Steel Blade** delivers a high-performance steel alternative built on the proven Sabre platform. Featuring a fully welded 3/4" Hardox® wear plate, it provides enhanced durability, extended service life, and reliable performance for municipal and DOT fleets. Engineered for cost stability, this blade offers a premium solution in today's changing material market.

MATERIAL PERFORMANCE

- ✓ Extended life vs. standard steel
- ✓ Enhanced wear resistance
- ✓ 2x the hardness of standard steel
- ✓ 70% increase in tensile strength
- ✓ 140% increase in yield strength
- ✓ Sectional design

ENGINEERING & DESIGN

- ✓ 3/4" thick Hardox® 450 armored wear plate
- ✓ 3/4" 1020 steel blade body
- ✓ Fully welded construction
- ✓ Increased wear plate thickness and height
- ✓ Integrated wear indicators
- ✓ Designed for safety and handling

COMPANY CORE CAPABILITIES

- ✓ Snowplow cutting edges and wear parts
- ✓ Armored steel blade system
- ✓ Sabre® patented blade technology and engineering
- ✓ Hardox® wear plate integration
- ✓ Municipal and DOT supply
- ✓ Nationwide distribution

OPERATIONAL BENEFITS

- ✓ Cost-stable alternative, not dependent on carbide
- ✓ Reduced material costs
- ✓ Lower upfront cost
- ✓ Reduced downtime
- ✓ Longer replacement intervals
- ✓ Fast installation and changeout

ABOUT EVOLUTION EDGES

Evolution Edges, a division of Chemung Supply Corporation, is a leading U.S. manufacturer and supplier of high-performance snowplow blades and wear parts.

Founded in 2009, we deliver fast, reliable service.

Acquired **Built Blades** and the patented **Sabre® Blade** in 2020.

American-made in a solar-powered production facility.

Distribution Network:

- Elmira, NY - Headquarters
- Denver, CO - West Coast Hub
- Faster Nationwide Shipping
- Reduced Freight Costs
- Lower Emissions
